DATA ANALYSIS

Data Analysis: Doing It Right and Doing the Right Thing
Victoria Bernhardt

Watch the video individually or with a team. As you watch, consider your current data analysis process.

AFTER WATCHING THE VIDEO, DISCUSS AND ANSWER THESE QUESTIONS:

- How does your school's data analysis process align with Bernhardt's description and the TAIS Data Analysis process?
 - What data do you currently review?
 - What process do you currently use for analyzing that data?
- How do you use summative versus formative data?
- According to Dr. Bernhardt, why is it important to consider process data?
- Why do you need data to measure implementation of the vision?
- Are you, as Bernhardt urges, "doing it right and doing the right thing for kids?"

NOW, PUT WHAT YOU'VE LEARNED TO WORK:

- Review your school vision. If a stranger read your improvement plan, would it be obvious that it is a path to achieve the vision? If not, adjust the plan accordingly.
- Review your use of process, formative, and summative data. Are there areas that you want to strengthen?
- Conduct a data analysis, using Bernhardt's questions to guide your thinking:
 - Where are we now?
 - How did we get here?
 - Where do we want to be?
 - How will we get there?
